

MEYER SPYDER® 2.5 Semi-Automated Grease Controller

MEYER SPYDER® 2.5 Semi-Automated Grease Controller

MEYER's SPYDER® 2.5 Semi-Automated Grease Controller is a bolt-on addition to our existing Gen- 2 Manual Grease Manifold System. This unit allows customers to utilize some of the Gen-3 features at a more affordable price point.

Features and Benefits:

- Stage and pressure-based grease programs available
- The ability to grease based on lost pressure situations, automated field volume greasing, or traditional remote greasing
- Customizable to limit grease used per cycle
- Prevents overpressuring of valves
- Dramatically reduce or eliminate Red Zone exposure
- Reduce NPT
- Stand alone controller attaches directly to existing MEYER grease units and Gen-2 SPYDER® Manifolds
